Subject: MITIGATION REQUEST FOR THE 2014 IRRIGATION SEASON FOR WATER DISTRICT NO 34

In accordance with the IDAPA 37 Title 03 Chapter 12 of the Idaho Department of Water Resources Water Distribution Rules for Water District 34, this is a request and Call for the Conjunctive Administration of Ground Water and Surface Water Rights (Rule 50) for the lower part of the Lost River Valley for District 34 during the 2014 irrigation season as provided in the Idaho Administrative Code by the Department of Water Resources. Last year 2013, there was a mitigation call and the process was evaluated with absolutely no results on behalf of the Idaho Department of Water Resources. Rule 50 is just as important as any of the other rules and needs to be implemented. 2014 is shaping up to be a very poor water year so mitigation is even more important and necessary than 2013. If there are not some positive results this year, then further alternatives will be explored.

Mitigation will not be of any value if it is conducted only in the early part of the irrigation season. Normally, some decrees could end as early as June while most would not go off until the end of July or mid August depending on the weather. When the decrees go off, this is the time that mitigation needs to take place to extend these decrees through the irrigation season and the way things look, this requirement could be much earlier than in 2013.

We the undersigned request implementation and adherence to Rule 50 of the IDAPA 37.03.12-Department of Water Resources Water Distribution Rules – District 34 for the irrigation season 2014 for the following water rights:
